

Client Hospital Admission & Staff Withdrawal

Keep this guide with you. Write your contact names and numbers in the boxes at the bottom.

IN THE ER: STAY & SUPPORT	ADMITTED: WITHDRAW
- Accompany and assist the client throughout ER triage and treatment. - Maintain continuous communication with your ILS Supervisor or Agency Administration. - Give real-time status updates while the client is in the ER.	- ILS direct services temporarily cease. - Staff must be withdrawn. - Hospital staff assume full primary care responsibility. - No ILS staffing during the inpatient stay without specific prior authorization.

Admission = the moment the client is officially transferred out of the ER into an inpatient bed or unit.

If the hospital asks you to stay

Respond professionally. Follow these steps in order:

- Inform & redirect.** Explain that the client is a Regional Center participant and ILS services automatically suspend upon hospital admission per regulatory guidelines.
- Hospital Social Work.** Advise the charge nurse or attending team to engage the hospital's Social Work department (typically familiar with Regional Center protocols).
- Service Coordinator.** If no hospital social worker is available, direct the nurse to contact the client's Regional Center Service Coordinator (SC).

You can say: "My client is a Regional Center participant. ILS services automatically suspend when a client is admitted, per regulatory guidelines. Your Social Work department can help, or you can contact the client's Regional Center Service Coordinator."

RCOC authorization for inpatient staffing

Only if the hospital maintains that the client needs dedicated ILS staff during the inpatient stay:

#	Step	What happens	Who is responsible
1	Contact On-Call	If the primary SC is unreachable, the hospital team contacts the RCOC Emergency On-Call number to request temporary staffing approval.	Hospital Staff
2	Agency Notification	If approval is granted, the RCOC On-Call Representative contacts the ILS Agency directly.	RCOC On-Call Staff
3	Re-engagement	ILS staff may redeploy to the hospital room only after direct verbal or written authorization is received from RCOC.	ILS Agency Admin
4	Written Documentation	If authorization occurs after business hours, formal written approval from the RCOC SC must be secured the next business day.	ILS Supervisor

A nurse's request is not authorization. RCOC contacts the ILS Agency directly. Return to the hospital room only when Agency Administration confirms RCOC has authorized it.
