

Client Hospital Admission & Staff Withdrawal Protocol

Independent Living Services (ILS) Staff | 2026

Employee Name	
Training Date	

By initialing each statement and signing below, I attest that:

#	Statement	Initials
1	I completed training on the Standard Operating Procedure: Client Hospital Admission & Staff Withdrawal Protocol, and I received a copy of the Quick Reference Guide.	
2	I understand that I must accompany and assist the client throughout the ER triage and treatment process.	
3	I understand that I must maintain continuous communication with my ILS Supervisor or Agency Administration and provide real-time status updates while the client is in the ER.	
4	I understand that the moment a client is officially admitted (transferred out of the ER into an inpatient bed or unit), ILS direct services temporarily cease and I must withdraw.	
5	I understand that hospital staff assume full primary care responsibility upon admission, and that ILS staffing is not permitted during an inpatient stay without specific prior authorization.	
6	I understand how to respond if hospital staff ask me to stay: inform and redirect, refer them to the hospital's Social Work department, and, if no social worker is available, direct them to the client's Regional Center Service Coordinator.	
7	I understand that RCOC authorization is requested by the hospital, that RCOC contacts the ILS Agency directly, and that I may return to the hospital room only after authorization from RCOC has been received and my agency directs me to return.	
8	I understand that if authorization occurs after business hours, the ILS Supervisor must secure formal written approval from the RCOC Service Coordinator the next business day.	
9	I had the opportunity to ask questions, my questions were answered, and I agree to follow this protocol. I will contact my ILS Supervisor if I am unsure how to apply it.
