

MY LIFE SERVICES

QSP Documentation and Scheduling Guide

Staff Reference | Independent Living Skills Program

QSP (Quick Solve Plus) is our system for scheduling, timekeeping, mileage, and documentation. Sections 1 through 5 cover how to do each task in the app. Sections 6 through 8 cover breaks and how to schedule around them. Sections 9 through 12 cover deadlines, documentation standards, and what happens if a rule is missed.

Keep this guide. Your supervisor or trainer will walk through each section with you.

1. Shift Types

Every entry in QSP is one of these:

Shift type	What it is for
ILS Service	Direct service time with your client, working together on their ISP goals.
ILS Travel	Drive time and mileage between clients. Not billed to any client's direct service hours.
ILS Training	Staff meetings and trainings, in person or over Zoom.
ILS Admin	Time spent checking your timesheet, sending emails, working with your supervisor, or building your monthly schedule. Your supervisor will tell you when to use this shift type.
ILS Misc	Replacing direct service hours only after supervisor approval. Sick time or PTO. See the Attendance policy for how to request it.
Meal Break	Your unpaid 30-minute meal period. See Section 7.

2. Creating a Shift

1. Select **Schedule**, then **Employee View**, then your name to open your calendar.
2. Select the day, then the **+** button in the top right corner.
3. Select **Service Type** and choose the shift type.
4. Select **Client Name** and choose the client.
5. Enter the **Start Time** and **End Time**, then save with the floppy disk icon in the top right corner.

- **Any direct service shift longer than 3.5 hours must be approved by a supervisor before you schedule it.** Get approval from that client's case supervisor first, then build the shift. Scheduling it and asking afterward is not approval. Shifts of 3.5 hours or less do not need approval.

3. Clocking In and Out

- **Clock in the moment you arrive and out the moment you leave,** in real time, for every direct service shift.
- **Geofencing is on.** You cannot clock in or out unless you are at the location associated with that client and shift.
- **Your DSN must be done before you can clock out.** See Section 4.

STEP BY STEP

1. Select the **Clock** icon on the QSP mobile app homepage.
2. Select the ILS Service shift matching the scheduled time and the client you are about to meet.
3. Select the green **Clock In** button, confirm your location, and begin your shift.
4. When the shift is over, complete your DSN from the Daily Service Notes icon on the homepage.
5. Select the shift again and choose the red **Clock Out** button.

Training video: [Clocking In and Out with the QSP Mobile App](#)

Watch it any time you need more than these steps.

4. Daily Service Notes (DSNs)

- One DSN per client, per shift, documenting what you worked on and which ISP goals it served.

STEP BY STEP

1. Select the **Daily Service Notes** icon, then **My Daily Service Notes**.
2. Choose the client and shift, then **Continue**. You will see three action items marked Not Started.
3. Select the Daily Service Note action item.
4. The client's ISP goals appear. Mark Yes or No for each goal to identify what you worked on during the shift.
5. For each **Yes**, write a note describing the work done on that goal.
6. Select **Submit** at the bottom of the screen.
7. A **Summary** textbox appears. Use it for anything a supervisor needs to know about client progress, especially urgent details. Mark **High Priority** if it is urgent. If the previous page covered everything, write N/A.
8. Save with the icon in the top right corner.

Training video: [Documenting Services with ISP-Specific Daily Service Notes](#)

Watch it any time you need more than these steps.

5. Mileage

There are two kinds of mileage and they are logged in completely different places. Mixing them up is the most common documentation error.

Kind of mileage	Where it is logged
Direct service mileage	Driving with your client during a session, to an appointment, the store, or anywhere else. Logged under that shift's DSN. Never a separate travel entry.
ILS Travel mileage	Driving from one client to the next with no client in the car. Its own ILS Travel shift, with the mileage added to that shift.

Direct service mileage: client in the car

- **The driving stays inside that client's ILS Service shift.** You are still providing service while you drive with them.
- **Do not create an ILS Travel shift for it,** and do not add it to a travel shift you already created for that day.
- **The mileage is claimed through that shift's DSN,** alongside the note for the goals you worked on.

STEP BY STEP

Training video: [Claim Mileage with the QSP Mobile App: Auto Mileage DSN Form](#)

Watch it any time you need more than these steps.

ILS Travel mileage: driving between clients

- When you leave one client and drive to the next, create a separate ILS Travel shift to capture the drive time and mileage.
- **ILS Travel is paid time.** It counts toward your total hours for the day, which affects your breaks. See Section 8.
- It is not billed to any client's direct service hours.

STEP BY STEP

1. Create a shift as in Section 2, choosing ILS Travel as the service type.
2. Estimate the drive time from one client to the next, and enter it as the start and end time.
3. On the day of the shift, open it and select **Add Mileage**.
4. Enter the start address (the client you just finished with) and the end address (the client you are driving to).

5. Confirm the mileage and enter the exact figure in **Miles Driven**.
6. In **Service Notes**, write “Travel from client [name] to client [name]” and save.

6. Rest Breaks

Rest breaks are paid and cannot be waived. How many you get depends on your total hours worked for the day, not on any single shift.

Total hours worked that day	Paid 10-minute rest breaks
Under 3.5	None
3.5 up to 6.0	1
Over 6.0 up to 10	2
Over 10 up to 14	3

- **Add up all your paid shifts** for the day: ILS Service, ILS Travel, ILS Training, and ILS Admin. Do not count ILS Misc, which is sick time or PTO, and do not count unpaid gaps.
- **Take it near the middle of your work period** where practical, and no later than your 3.5th hour of work.
- **You are relieved of all duties.** No instruction or coaching, no documentation, no work calls, texts, or emails, no transporting clients, no admin tasks.
- **Driving is not a rest break.** An ILS Travel shift is duty time.
- **Rest breaks are paid, so they happen inside a paid shift,** never during an unpaid gap between clients.
- **Log it immediately when you get back.** Never before you take it, never at the end of your shift.
- **If an emergency cuts it short,** resume work and notify your supervisor as soon as practical.

STEP BY STEP: LOGGING A REST BREAK

1. Select **Schedule**, then **Employee View**, then your name.
2. Open the ILS Service shift during which you took the break.
3. Select **Rest Period** and enter the actual **Time Out** and **Time In**.
4. Save with the floppy disk icon in the top right corner.

7. Meal Periods

- **30 minutes, unpaid, completely relieved of duty** unless specifically authorized otherwise.
- **Without a signed waiver,** a meal period is required once you work more than 5 hours.
- **With a signed First Meal Period Waiver,** you may skip it on days of 6.00 hours or less. The waiver is voluntary, revocable in writing at any time, and automatically void on any day you work more than 6 hours.

- **6.01 hours or more and the waiver does not apply.** A meal period is required, no exceptions.

Your meal must start before the end of your fifth hour of work.

This is counted in hours worked, not clock time. Unpaid gaps between clients do not count toward the five hours, so on a split day the deadline lands later than you would expect. Taking a full 30 minutes too late in the day is still a violation.

- **Take your meal period at the time you scheduled it,** and take the full 30 minutes. QSP does not have a clock in or clock out for meal periods, so the scheduled shift is the record. If anything prevents you from taking your meal period as scheduled, or from taking all 30 minutes, tell your supervisor the same day.

STEP BY STEP: SCHEDULING A MEAL PERIOD

1. Select **Schedule**, then **Employee View**, then your name.
2. Select the day, then the **+** button in the top right corner.
3. Select **Service Type** and choose **Meal Break**.
4. Enter the start and end time, and confirm it does not overlap another shift.
5. Save with the floppy disk icon in the top right corner.

8. Scheduling Around Gaps Between Clients

A gap is unpaid time between two clients when you are released from duty and free to do what you like. Gaps do not change your break rules, but they do change the arithmetic, because the gap is not hours worked.

Four steps when you build a split day

1. **Add up your paid hours only.** ILS Service, ILS Travel, ILS Training, and ILS Admin. Leave out the gap and leave out ILS Misc.
2. Use that total to find your rest breaks in the Section 6 table.
3. Over 6.00 hours worked means a meal period is required and no waiver applies.
4. If a meal is required, count forward five hours of work to find your deadline, then schedule the meal to start before it.

The easy rule for split days.

If your first segment is 5 hours or less, schedule your meal as the last 30 minutes of the gap. You are already off duty, it is always before your deadline, and it records cleanly. If your first segment runs longer than 5 hours, the meal has to fall inside that first segment instead.

Worked examples

Schedule	Hours worked	Rest breaks	Meal period
9:00–1:00 Client A, gap, 3:00–6:00 Client B	7.0	2	Required. Must start before 4:00 PM. Best placed 2:30–3:00, at the end of the gap.
9:00–12:00 Client A, gap, 2:00–5:00 Client B	6.0	1	Waivable with a signed waiver.
9:00–12:00 Client A, gap, 2:00–5:30 Client B	6.5	2	Required. Must start before 2:30 PM.

Compare the last two. Thirty extra minutes on the second client changes the day from waivable to a required meal, and the deadline falls before the second client even starts. Check your totals when you build the schedule, not on the day.

Two things to tell your supervisor

- **Schedule a rest break in each segment on split days.** You may only be owed one, but one per segment is always compliant and easier to keep track of.
- **If you are expected to stay reachable or nearby during a gap,** say so. That time may need to be paid, which changes everything above.

9. Deadlines

Everything is due the same day. The only difference is whether QSP enforces it or you do.

What	When it is due
Monthly schedule	The last Friday of the month, for the following month, built in QSP.
DSN and mileage for a direct service shift	Before you clock out. QSP locks the shift once you clock out, so there is no next day to fix it.
Notes and mileage for ILS Travel, Training, and Admin shifts	The same day. QSP will let you enter these later, but same day is the expectation, not a courtesy.
Timesheet attestation	[TO BE CONFIRMED]

- Each client's schedule must fit inside their authorized monthly hours per their ISP.
- Before building your schedule, contact each case supervisor to confirm how many hours to reserve for that client, usually 2 to 5 hours a month, then build around what is left.
- **Once submitted and reviewed,** any change to a client's shift must be approved by that client's case supervisor. Changing it yourself in the app is not approval.

- **No direct service shift longer than 3.5 hours without supervisor approval.** This applies when you build your monthly schedule and any time you extend a shift afterward. Approval comes from that client's case supervisor, before the shift goes on the calendar.

10. Documentation Rules

Do

- Log each rest break immediately on returning from it.
- Make sure every entry reflects the break you actually took.
- Take your meal period at the time you scheduled it, and tell your supervisor the same day if you could not.
- Tell your supervisor right away if you cannot take a required break.
- Report technical issues promptly.

Do not

- Document a break before you take it.
- Save your documentation for the end of your shift, unless a technical issue or emergency prevented it.
- Falsify any record: hours, breaks, meals, mileage, geofencing, or sign-in and sign-out.
- Skip a break without telling your supervisor.

11. Missed or Interrupted Breaks

- Notify your supervisor as soon as practical, preferably the same workday.
- Your supervisor reviews the circumstances and documents the reason.
- Together you determine whether anything about your schedule needs to change.

12. Compliance and Non-Retaliation

- **Compliance with this guide is a condition of employment.** Inaccurate documentation of hours, breaks, meals, mileage, or sign-in and sign-out may result in corrective action, up to and including termination.
- **Reporting time pay.** If you report to work and are sent home early, you receive at least half your scheduled shift's wages, with a minimum of 2 hours and a maximum of 4.
- **You will receive this training** at new employee orientation, during annual compliance training, whenever a policy is revised, and whenever QSP procedures change.

Retaliation is prohibited.

My Life Services, Inc. strictly prohibits retaliation against any employee who takes or requests a break, reports a missed, delayed, or interrupted break, raises a payroll or timekeeping concern, or reports a violation of this policy in good faith. Concerns can be raised with your supervisor, the Program Manager, Human Resources, or executive management.

Call-outs, lateness, client cancellations, time off requests, and sick time are covered in the Attendance, Call-Outs, and Missed Sessions policy, not in this guide. Refer to that document for notice requirements, the attendance email, how to request time off, and what to do when a client cancels. This guide covers only how to record those things in QSP once they are approved.

This guide summarizes company policy for quick reference. Where it differs from current written company policy, company policy and your supervisor's direction control. When in doubt, ask your supervisor.
